EU-CONEXUS
Research for Society
Project title: EU-CONEXUS Research for Society

Acronym: EU-CONEXUS RFS

Funding Programme: HORIZON 2020 Programme – Science with and for Society

Start: 1 March 2021
End: 29 February 2024
Duration: 36 months
Total budget: 1 992 960 EUR
EU grant: 1 992 960 EUR
Aims of institutional transformation of European University Alliance

1. Developing an integrated and long-term strategy and agenda on research and innovation
2. Implementing actions and strategies to strengthen human capital, enabling balanced brain circulation and promoting gender balance
3. Creating best practices and conditions for sharing infrastructures and other resources
4. Strengthening relationships between universities and industrial sectors
5. Strengthening links with society, private companies and stakeholders
6. Sharing knowledge with citizens living in coastal areas
Research for Society Opens Up Opportunities:

TOWARDS BUILDING INNOVATIVE EUROPEAN UNIVERSITY ALLIANCE

— to create an internationally competitive research and innovation structure
— to train researchers who follow a career path
— to implement innovative partnerships with industries
— to act globally and involve the society
— to promote a gender equality
The project relies on six main expectations

1. Interconnection of transformations will complete already employed long-term vision for the European University.

2. Facilitating researchers’ mobility and access to multiple work environments will bring a new profile of European researchers focusing on environmental issues.

3. Enabling public and intra-alliance access to information will increase exchanges, enable cooperation and co-creation, and develop inter-partner projects.

4. Sharing resources will mean lower costs, offer the opportunity to achieve an ecological impact on multiple purchases and investments in new resources.

5. Training and exchanges with actors of the social and economic innovation system will enable to reduce challenges that coastal areas and cities are facing.

6. Understanding the specific challenges each university will harmonise practices and working conditions, making them fairer, more sustainable and more environmentally friendly.
PROMOTING EQUALITARIAN CAREERS

— Comparing women/men working conditions and for promoting equalitarian careers

— Developing a knowledge transfer and innovation management system for representing both genders equally

— Bringing a specific focus of an innovative mentorship programme

— Promoting gendered innovations

Where do we want to be?

In 3 years our research approach will deliver an innovative, multi-disciplinary university service, equally covering education, research, and societal needs.
